

## Building instructions

### Kit storage boxes complete set for Carson Goldhofer STN-L M1:14

**Best.-Nr.: 2020-9345-GOTSET**

**Version 1.0 – 20.07.2020**

## Description

This polystyrene milled parts set for storage boxes complete set is designed as an accessory for the Carson Goldhofer STN-L low loader.

The front storage box system is screwed to the trailer frame using the PLA-holders provided or attached with magnets.

The storage box dummies between the fenders and the rear boxes are screwed onto the existing threaded stubs of the fenders.

## Assembly Procedure

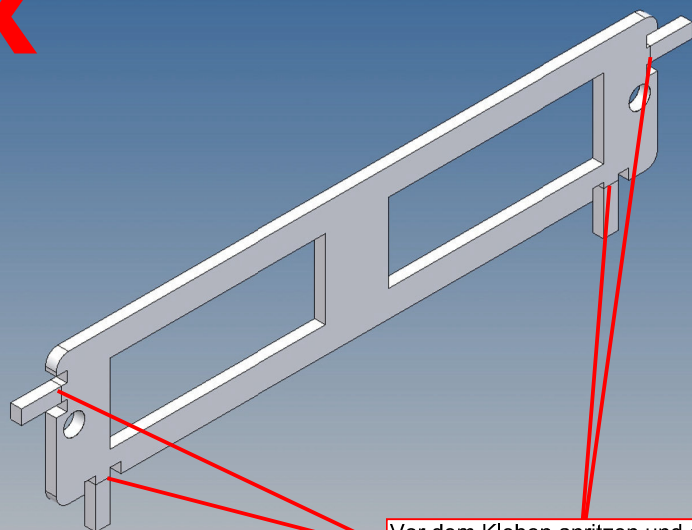

Before you put the parts together please read the assembly instructions carefully and pay attention to the assembly sequence and test the fitting accuracy of the parts before gluing them together.

It is very important that at the first construction step paying attention to the correct side to put the box together, so that really produces a left or right box.

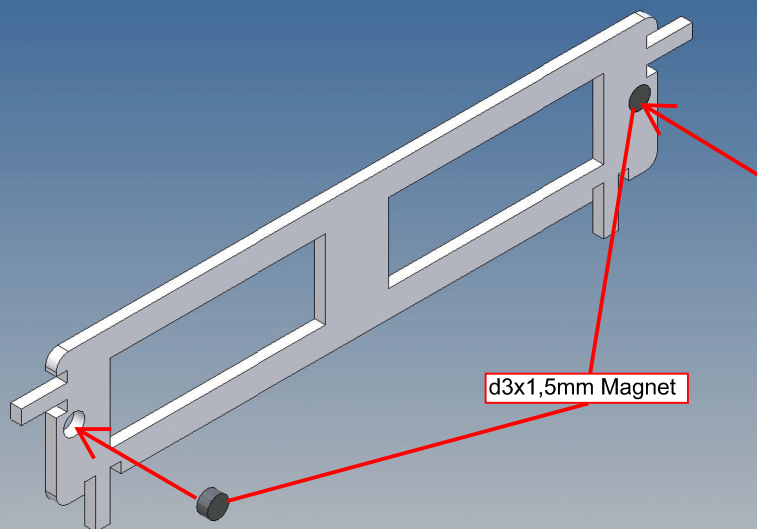

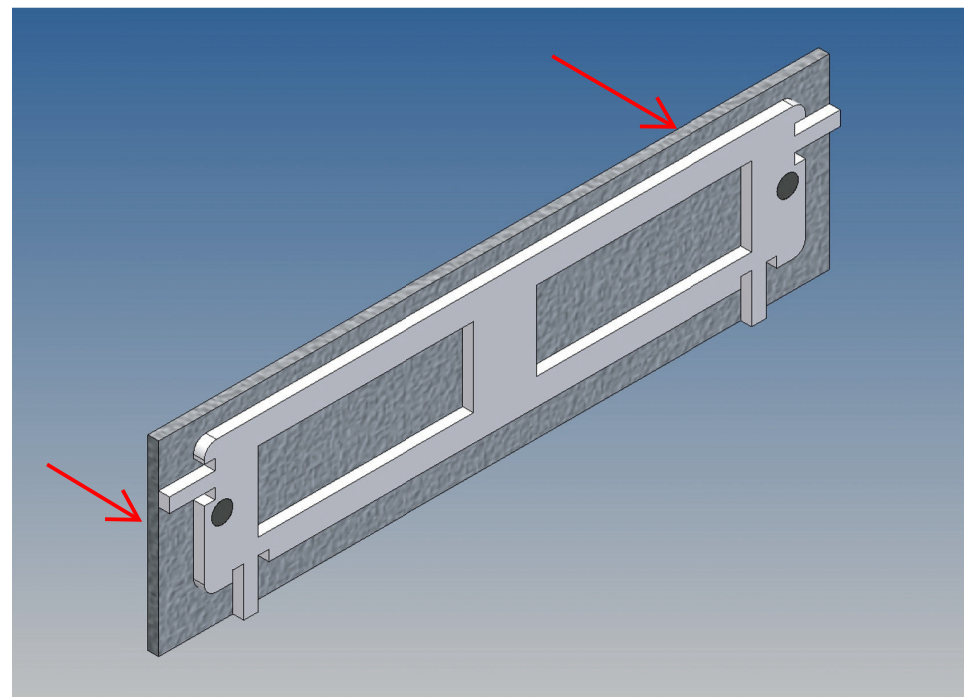

It is helpful to fix the parts at first only on a few points with super-glue and after a check along the edges fully with super-glue or a polystyrene-glue.

The parts are made of polystyrene, if you use super-glue in combination with activator spray, please be aware that the activator spray can destroy polystyrene – because of that you should use it very carefully or use only polystyrene-glue.
