

Assembly Instruction

**Storage box set for Carson
Dump truck 2/3-axle semi-trailer M1:14**

Best.-Nr.: 2023-9345-MU3

Version 1.0 – 20.07.2023

General Description

This parts set is designed for a storage box set for Carson dump truck 2/3-axle trailer (item no. 500907050) M1:14.

These are two storage boxes for technology and batteries.

The front storage box is hooked onto the tilt spindle axle and is fixed to the aluminum plate of the king bolt with an M3 screw.

Round or square openings are already provided on the side or in the rear area. These are only indicated and must be cleared at your own discretion or benefit.

The rear storage box is screwed to the axle suspension, the last axle. To do this, remove the two outermost nuts and fasten them with the remaining screws.

The storage box itself does not have any predefined cable openings.

An IR light module (SM-IR-16-2) from Beier-Electronic was placed as a test example for future technology.

Assembly Procedure

Before you put the parts together please read the assembly instructions carefully and pay attention to the assembly sequence and test the fitting accuracy of the parts before gluing them together.

It is helpful to fix the parts at first only on a few points with super-glue and after a check along the edges fully with super-glue or a polystyrene-glue.

The parts are made of polystyrene, if you use super-glue in combination with activator spray, please be aware that the activator spray can destroy polystyrene – because of that you should use it very carefully or use only polystyrene-glue.
