

Assembly Instruction

Combo-Box for TAMIYA Reefer Semi-Trailer (1:14)

Best.-Nr.: 2016-9346-180

Version 1.0 – 01.12.2016

General Description

This polystyrene-milled parts set for a storage box is designed for the TAMIYA reefer semi-trailer (M1:14)

The storage box can be mounted on the trailer frame and has on the outside of a cover with kinematics, which is held by magnets (are magnets in separate bag).

Inside the box can technology or scale model pallets accommodated.

For mounting on the trailer frame, Distance spacers are provided, which create a gap to create space for existing screw heads on the frame.

Assembly Procedure

Before you put the parts together please read the assembly instructions carefully and pay attention to the assembly sequence and test the fitting accuracy of the parts before gluing them together.

It is helpful to fix the parts at first only on a few points with super-glue and after a check along the edges fully with super-glue or a polystyrene-glue.

The parts are made of polystyrene, if you use super-glue in combination with activator spray, please be aware that the activator spray can destroy polystyrene – because of that you should use it very carefully or use only polystyrene-glue.

2x

Magnete

Annotation:

For technical reasons delivery also magnets with different dimensions may be enclosed.
